4

**INTERRUPTED**

**Game Instructions:**  
7 cards will be dealt to each player. (if there are fewer players, the remaining cards are put on a pile to be taken when needed).  
The goal is to create a complete story (numbers 1-7 of one colour). The first player who collects a full story, wins.  
**Game rules:**  
The person who has the turn will ask for a card (specifying number and colour) from any other player. To request a card s/he must have at least one.  
number from that collection (colour). If the other player does not have the requested card, the person who requested it loses that round, and the turn passes to the next person on the right.

7

**HAPPY END**

**Activity Instruccions:**

Create 4 groups.

Each group will choose a colour, (each team will have a colour) offered by the workshop and the story they will develop in the 7 scenes of their storyboard.

They will paint from the chosen colour the circle that surrounds the number of the letter. This will identify each of the stories in the game.

As a group, they will discuss, what happens in their story, and they will draw the story, in the form of a storyboard. Once the process of creating the story is finished, painting the cards, creating collages, ... they shuffle them together with those of the other teams and then they can start playing.
